

DIGITAL INCLUSION PROJECT

EFFECTIVE, PROACTIVE, COMMUNITY PARTNERSHIP

Would you like to be part of a community partnership that addresses the Digital Divide for disabled people and people with mental health challenges in the Forest of Dean?

We've got some bold and exciting plans to reach, support and enhance these communities!

We're exploring the opportunity to apply for funding from the Barnwood Trust's Digital Inclusion Fund. If successful, we plan to co-ordinate a first of its kind, district-wide partnership to break down barriers and unlock communities.

This partnership will bring together the right and relevant people who will work to understand what is needed and where, develop centralised, accessible information and the delivery of targeted pilot projects.

Do you have the knowledge, skills, experience, and motivation to help us make real change?

If so, and you're interested, we'd love to hear from you!

To identify potential partners, we are inviting you to provide us with a brief description of what you/your organisation does and why you would like to be involved. Please send this to Alex at community@fvaf.org.uk

Remuneration would be provided for partners participation

Project duration:18 months
